

### **Finke Road Closure update 29th May**

Please see below further update to the information provided earlier this week, in relation to traffic movements through road closures during the running of the 2019 Tatts Finke Desert Race.

The Finke Desert Race committee has received clarifying advice that Motor Accident Insurance cover will apply for occupants of non-competitive road registered vehicles using the length of the Old South Road when permitted by race organisers. Noting that NT Road Rules apply to all non-competitive road registered vehicles using the road.

**The event can now continue as in previous years, with controlled traffic flow throughout the Deep Well to Finke community road closure corridor.**

Those travelling on the closed road will be under the control of Finke Desert Race organisers. Please follow instructions from both Race Officials and Emergency Services personnel at all times whilst down the track. A UHF radio will allow you to listen to broadcasts from Race Control.

Please help us to ensure the race is a safe one without incident and above all respect the land that you may be camping on.
